

SAFER WITH EVERY SWIPE

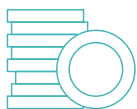

Secure your organization's
terminal sales with
CSG Forte Protect.

When bad actors try to steal credit card information, extra encryption means extra peace of mind. CSG Forte Protect adds a security layer to your in-person transactions, disguising card data from the moment your customer swipes, dips or taps.

ENHANCE SECURITY AND PROTECT PAYMENT DATA WITH CSG FORTE PROTECT, AN ADD-ON SERVICE TO YOUR POINT-OF-SALE PAYMENT SOLUTIONS.

Reduce PCI scope – Your systems, network and servers never store sensitive data.

PCI-validated point-to-point encryption (P2PE) – Encrypt card data from point-of-sale on the device until the payment is processed.

Keep data secure – Removes at-risk data from all cashiering point-of-sale systems, eliminating a primary target for hackers.

PCI-VALIDATED SOLUTIONS
ARE CONSIDERED THE “GOLD
STANDARD” FOR CARDHOLDER
DATA PROTECTION

ENHANCE SECURITY AND PROTECT PAYMENT DATA WITH CSG FORTE PROTECT

HOW DOES IT WORK?

- > You order a secure point-of-sale terminal.
- > Authorized personnel install CSG Forte's software on each terminal.
- > Terminals are shipped to your business/ organization in tamper evident packaging.
- > A CSG Forte Support team member contacts you to help enable the service.
- > With each swipe, dip or tap, sensitive payment data is encrypted for protection.
- > The encrypted information is sent to CSG Forte, then to our trusted partner for decryption.
- > Data is securely sent back to CSG Forte, then to the payment processors.
